Overview

The purpose of this application is to approve a class II permissive change to the model 800 MHz iDEN RRH to allow LTE operation. The original grant approved CDMA and EVDO modulations.

No hardware changes have been made and no new frequency determining circuitry has been added. The maximum output power remains the same. Only software changes were made to allow LTE operation.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
